REPORT.

TO THE RIGHT HON.

SIR GEORGE OTTO TREVELYAN, BART., M.P.,

Her Majesty's Secretary for Scotland.

GENERAL REGISTRY OFFICE OF BIRTHS, ETC.,

EDINBURGH, 18th October 1894.

SIR,

I had the honour in 1893, in conformity with the requirements of the seventh section of the Scottish Registration Act, 17 and 18 Vict., cap. 90, to transmit to you, as Her Majesty's Secretary for Scotland, General Abstracts of the Births, Deaths, and Marriages registered in Scotland during the year 1892, along with the usual explanation and commentary.

At the same time my Twenty-eighth Annual Report on Vaccination was transmitted, in accordance with the nineteenth section of the Scottish Vaccination Act, 26 and 27 Vict., cap. 108.

I have now the honour to transmit the Detailed Annual Report, together with the relative Tables, regarding the Births, Deaths, and Marriages registered in Scotland during the same year (1892).

I have the honour to be,

SIR,

Your most obedient Servant,

STAIR AGNEW,

Registrar-General.

REPORT TO THE REGISTRAR-GENERAL,

BY R. J. BLAIR-CUNYNGHAME, M.D., F.R.S.E.

SIR,

As a preface to this report, and bearing upon the well-being of the inhabitants of Scotland, it may be remarked, that, as a rule during the year 1892, there was a marked prevalence of northerly and easterly winds, with a corresponding diminution of southerly and westerly. At the same time there was a decided depression of temperature all over the country, with a persistent diminution of sunshine.

The rainfall was somewhat under the average.

TABLE I.—Population estimated to the middle of each year; with the Number of Births, Deaths, and Marriages registered in Scotland during each of the Years 1855 to 1892, and their Proportion to the Population; also the Excess of Births over Deaths, the Illegitimate Births, and their Proportion to the Total Births.

YEARS	Estimated Population.	BIRTHS.		Deaths.	Marriages.	Excess of Births over Deaths.	Percentage to Population.			Percent. of Illegit. to Total Births.

Principal Towns above 25000 inhabitants. Large Towns above 10000 and under 25000 inhabitants. The Small Towns from 3000 to 10000 inhabitants from 1855 to 1881, but from 1881 and upwards the Small Towns have from 2000 to 10000 of population.

1891, was 4,025,647,—the males, 1,942,717; the females, 2,082,930. As estimated from those numbers the population, as at 30th June 1892, amounts to 4,063,452,—the males, 1,961,401; the females, 2,102,051.

For Registration purposes the whole country is primarily divided into five great districts, upon which, on the present occasion, changes as to area and population are given effect to. Changes in the Principal Town Districts are caused by certain alterations which took place in Glasgow on 1st November 1891, increasing the area and population of that city. At that time a portion of the Landward and Suburban of Glasgow which had been treated of as a Principal Town in these Reports during the past intercensal period, is absorbed into Glasgow, and in consequence disappears from the list of Principal Towns. Aberdeen is increased in area so as to include the village of Torry. The Burghs of Govan and Partick now together constitute a Principal Town in these Reports. Again, from the Census enumeration, it is found that the population of Coatbridge, formerly a Large Town, is now such as to raise it to the rank of a Principal Town. The following are added to the Large Towns:—St Ninians, Kirkintilloch, Old Kilpatrick, and the Landward of Eastwood, as also that of Kinning Park. In consequence of the increase or decrease of the population of some places, certain changes are necessitated in the

TABLE IV.—Percentage of Births, Deaths, and Marriages in the Five Groups of Districts of Scotland, to the Population during each of the Years 1855–1892.

Small-Town and Mainland-Rural Districts. No change occurs in the Insular-Rural Districts.

BIRTHS.

125,043 births were registered in Scotland during the year, fewer by 943 than for the previous year, and giving a birth-rate of 3·08 per cent., or 308 births for every ten thousand of the population, with the exception of that for 1890, the lowest which has yet been recorded. The mean birth-rate for the last ten years is 3·21 per cent. The male births number 64,356, and the female 60,687, the former exceeding the latter by 3669. The births outnumber the deaths during the year by 49,498. The number of illegitimate births is 9248, equal to 7·40 per cent. of the whole,—the lowest rate recorded. The male illegitimates are 4709, the female 4539.

From Tables VIII. and IX. it is seen how the births are distributed over the five Registration Districts:—Thus, in the Principal Town Districts the total natal events are 52,240, equivalent to a birth-rate of 3·25 per cent.,—the males number 26,938, the females 25,302; in the Large Town Districts they total to 17,264, or 3·34 per cent. of a birth-rate,—males numbering 8754, females 8510; in the Small Town Districts they amount to 27,222, or at the rate of 3·16 per cent.,—males 14,108, females 13,114; in the Mainland-Rural Districts they are 25,441, or 2·67 per cent. to population,—males 13,053, females 12,388; and in the Insular-Rural Districts the births are 2876, or at the rate of 2·30 per cent.,—the males being 1503, the females 1373.

As to the Principal Towns, Table Va. shows how in Edinburgh the birth-rate to the population is 2·71 per cent.; in Perth it is 2·78 per cent.; in Aberdeen it is 3·08 per cent.; in Dundee it is 3·14 per cent.; in Kilmarnock it is 3·23 per cent.; in Leith it is 3·27 per cent.; in Paisley it is 3·28 per cent.; in Glasgow it is 3·41 per cent.; in Greenock it is 3·58 per cent.;

TABLE Va.—Number of Births, Deaths, and Marriages in the Principal Towns of Scotland during 1892, and their Proportion to the Estimated Population; also the Illegitimate Births, and their Proportion to the Total Births.

TOWNS.	Esti- mated Popu- lation, 1892.	BIRTHS.		ILLEGITIMATE BIRTHS.		DEATHS.		MARRIAGES.	
		Births.	Per cent. to Pop.	Illegit. Births.	Per cent. to Total Births.	Deaths.	Per cent. to Pop.	Mar- riages.	Per cent. to Pop.

16·47 per cent. in Wigtown, Dumfries being next with 13·33 per cent.; Banff with 13·20 per cent.; Elgin with 13·01 per cent.; and Aberdeen with 12·76 per cent. In seventeen counties the rate is under that for Scotland which is 7·40 per cent.; being lowest in Ross and Cromarty, 4·95 per cent.; in Renfrew, 4·90 per cent.; in Dumbarton, 4·71 per cent.; and in Clackmannan, 3·90 per cent.

Of the total births registered during the year in Scotland, 64,356 were males, and 60,687 females, which is in the proportion of 106·0 of the former to every 100 of the latter. Among the legitimate births alone it is as 106·2 is to 100. In England the male births were to the female as 103·5 is to 100.

During the year 1468 of the mothers bore twins, and 17 bore triplets at a birth, so that of the total mothers bearing children, one in every 84 bore two, and one in every 7267, three children at a birth.

The births were registered throughout Scotland in each month in the following proportions:—7·69 per cent. during September, 7·87 per cent. during January, 7·91 per cent. during February, 8·19 per cent. during November, 8·27 per cent. during October, 8·31 per cent. during July, 8·34 per cent. during August, 8·41 per cent. during December, 8·46 per cent. during March, 8·69 per cent. during April, 8·88 per cent. during June, and 8·98 per cent. during May.

The birth-rate for each ten thousand of estimated population in the following European States, is 363 in Prussia and Italy, 362 in Austria, 357 in the German Empire, 320 in the Netherlands, 296 in Norway, 295 in Denmark, 289 in Belgium, 280 in Switzerland, and 221 in France.

MARRIAGES.

The number of marriages registered throughout Scotland during 1892 was 28,670, being 701 more than during the preceding year, and gives a rate of 70·56 marriages per ten thousand of the population as estimated,—the highest rate since the year 1883. The mean average rate for the last

TABLE IX.—Proportion of Births in 1892. Percentage of Births to Population, and of Illegitimate to the Total Births; also the Proportion of Males to Females in the Legitimate, Illegitimate, and Total Births; with the Proportion of Mothers who bare Twins and Triplets in Scotland, and its Five Groups of Districts in 1892.

FIVE GROUPS OF DISTRICTS.	Per-centage of Births to Population.	Per-centage of Illegit. to Total Births.	Proportion of Males to every 100 Females in the			Proportion of MOTHERS who bare TWINS. — One in every	Proportion of MOTHERS who bare TRIPLETS. — One in every
			Total Births.	Legitimate Births.	Illegit. Births.		
Principal Town	3·248	7·1	106·5	106·1	111·1	84·1	7373
Large Town	3·343	6·0	102·9	103·5	92·9	87·5	8533

ten years is 67 per ten thousand. The rate for England during the present year is 77 per ten thousand.

The marriage rate, as usual, differs a good deal in the five Registration Districts, being 85·69 for every ten thousand of the inhabitants in the Principal Town Districts, in the Large Town Districts it is 70·78, in the Small Town Districts it is 66·21, in the Mainland-Rural Districts it is 53·62, and in the Insular-Rural Districts it is 34·07 per ten thousand population as estimated. These proportions for the present year, when compared with the corresponding for 1891, indicate an increase in the Principal Town Districts, Small Town and Mainland-Rural Districts, a diminution in the Large Town and Insular-Rural Districts.

Table VI. shows, among other things, how the marriage rate varies in the different Counties of Scotland, from 84·59 per ten thousand of the population in Lanark, the highest, to 29·28 in Sutherland, the lowest. In seven Counties the rate is over the mean of that for Scotland, being 72·83 in Kinross, 74·21 in Forfar, 74·26 in Ayr, 77·46 in Linlithgow, 77·50 in Stirling, 81·03 in Edinburgh, and, as just mentioned, 84·59 in Lanark. Those counties in which the lowest marriage rate occurs are Ross and Cromarty, with one of 40·38 per ten thousand, Argyll with one of 36·91, Shetland with one of 36·04, Caithness with one of 35·94, and Sutherland with one of 29·28.

Table Va. gives the number and proportion of marriages in each of the Principal Towns of Scotland, the latter being as follows:—91·4 in every ten thousand of the estimated population of Glasgow, 90·3 in Edinburgh, 83·4 in Dundee, 83·5 in Aberdeen, 66·7 in Govan and Partick, 77·2 in Leith, 80·1 in Paisley, 77·1 in Greenock, 69·6 in Coatbridge, 82·7 in Perth, and 71·9 in Kilmarnock.

The fertility of each marriage is estimated in the usual manner. The number of marriages registered during 1886 was 24,515, and the legitimate births during the present year 1892 are 115,795, so that $\frac{115,795}{24,515}$ gives 4·32 as the average fertility of each marriage, or 432 children were born to every 100 marriages. In England the average number of children born to each marriage was 4·38, or 438 to every 100 marriages.

Table XI. gives the number of marriages as performed by the clergy of

an irregular nature. In other words, 44·87 per cent. of the whole were performed by clergymen of the Established Church, 19·80 per cent. by those of the Free Church, 11·46 per cent. by those of the United Presbyterian Church, 9·94 per cent. by those of the Roman Catholic Church, 2·82 per cent. by those of the Episcopal Church, in 6·91 per cent. of the whole the officiating minister belonging to some other denomination, and 4·20 per cent. of the marriages were irregular.

Upon looking back through these Reports since their commencement in 1855, we find that, of the whole marriages, 45·50 per cent. have been celebrated under the auspices of the Established Church, 21·97 per cent. under those of the Free Church, 12·97 per cent. under those of the United Presbyterian Church, 9·35 per cent. under those of the Roman Catholic Church, 2·43 per cent. under those of the Episcopal Church, 6·24 per cent. under those of a denomination other than the foregoing, while 1·30 per cent. of all have been irregular.

Table Xa. gives the number and proportion of the marriages as

registered under the same headings in the Principal Towns and Counties of Scotland. In the case of the Towns the largest proportion of Established Church marriages occur in Leith and Aberdeen, where they form 51·67 per cent. and 55·68 per cent. respectively of the total; the smallest being in Paisley, 27·94 per cent., and Coatbridge, 27·10 per cent. Of the Free Church marriages the largest proportion occur in Kilmarnock, 25·12 per cent., and Perth, 25·20 per cent.; the smallest in Greenock, 15·43 per cent., and Coatbridge, 14·02 per cent. The United Presbyterian marriages bulk relatively most largely in Perth, where they form 14·80 per cent., and in Paisley, 16·73 per cent. of the whole; least so in Greenock, with 7·00 per cent., and Aberdeen with 4·32 per cent. Marriages in accordance with the formulæ of the Roman Catholic Church occur in greatest ratio in Greenock, 20·78 per cent., and in Coatbridge, 36·92 per cent.; lowest in Leith, 3·33 per cent., and Aberdeen, 1·60 per cent. Episcopal Church marriages are proportionately most marked in Leith, where 5·93 per cent., and in Edinburgh, where 8·28 per cent. of the whole fall under this heading; being least so in

Glasgow, 1·91 per cent., and in Coatbridge, 0·93 per cent. Those in accordance with the procedures of other denominations are greatest in Dundee, 11·44 per cent., and in Paisley, 12·87 per cent.; least so in Leith, 5·74 per cent., and in Edinburgh, 4·60 per cent.; while irregular marriages were far most frequent in Edinburgh, where 9·08 per cent., and in Glasgow, where 11·44 per cent. of the whole are of this nature.

In seventeen counties, 50·00 per cent. or over of the marriages are credited to the Established Church, the highest proportion being in Aberdeen, with 61·15 per cent., Dumfries, 61·17 per cent., Banff, 61·76 per cent., Peebles, 61·90 per cent., Haddington, 65·74 per cent., Kinross, 68·75 per cent., Kirkcudbright, 69·30 per cent., Wigtown, 71·12 per cent., and Kincardine, 73·10 per cent.; the lowest being 31·22 per cent. in Inverness, 17·35 per cent. in Ross and Cromarty, and 16·39 per cent. in Sutherland. In the case of the Free Church five counties show a percentage of over 50·00, viz., Caithness, with 50·74 per cent., Inverness, 53·05 per cent., Nairn, 57·78 per cent., Ross and Cromarty, 78·55 per cent., and Sutherland, 83·61 per cent.; the lowest being 14·06 per cent. in Dumbarton, 12·30 per cent. in Wigtown, 12·28 per cent. in Kirkcudbright, 11·45 per cent. in Clackmannan, 10·69 per cent. in Selkirk, 10·68 per cent. in Shetland, and 6·25 per cent. in Kinross. Marriages in connection with the United Presbyterian Church attain their maximum in Berwick, with 22·52 per cent. of the whole, Orkney with 24·43 per cent., and Shetland with 40·78 per cent.; their minimum in Ross and Cromarty, with 2·85 per cent., Caithness, 2·20 per cent., Inverness, 2·11 per cent., and Kincardine, 1·52 per cent.; there

0·92 per cent.; none occurring in Sutherland, Nairn, Kinross, and Peebles. Marriages, irregular in their nature, are most prominent in Forfar, 3·23 per cent., Edinburgh, 6·77 per cent., and Lanark, 8·21 per cent.; there being none in Shetland, Caithness, Sutherland, Ross and Cromarty, Nairn, Kinross, Clackmannan, Haddington, Peebles, Selkirk, Kirkcudbright, and Wigtown.

Tables XIII. and XIV. deal with the ages at which matrimony was entered upon by both males and females. Of the 28,670 marriages registered during the year, only one of each sex omitted to mention his or her age in the Register. 1785 of the bridegrooms were under 21 years of age on the occasion, and 5640 of the brides were the same. One girl was married before reaching the age of 15 years, five were between 15 and 16 years, and fifty-nine between 16 and 17 years. Three of the husbands were between 16 and 17 years, fifteen between 17 and 18, and one hundred and fifty-one of them were between 18 and 19 years. At the opposite end of the scale ten of the bridegrooms were over 75 years, and four of the brides were over 70 years. Table XIV., which indicates the proportion in which men and women married at different ages during the

year, shows that in Scotland, while 2·42 per cent. of the former were under 20 years of age, 11·55 was the corresponding percentage with the latter; these ratios are exceeded in the case of both sexes in the Principal Town Districts, and in that of the females alone in the Large and Small Town Districts. At ages between 20–25 years, 35·11 per cent. of the men and 44·38 per cent. of the women married; ratios exceeded in the case of both sexes in the Large and Small Town Districts. 33·22 per cent. of the men and 26·03 per cent. of the women were between 25–30 years at marriage; exceeded in the case of both sexes in the two Rural Districts. Between 30–35 years, 14·12 per cent. of the husbands and 9·38 per cent. of the wives married; exceeded in the case of the former in the Large Town Districts and of both in the Mainland and Insular-Rural Districts. Between 35–40 years, 6·83 per cent. of the men and 4·28 per cent. of the women were married, exceeded in the case of both sexes in the Principal Town Districts and in the two Rural. At ages after this the percentage of those who marry falls very markedly, and that in all the Districts.

During the year, 24,873 bachelors espoused spinsters, 769 bachelors

between bachelors and spinsters, 2·68 per cent. between bachelors and widows, 7·79 per cent. between widowers and spinsters, and 2·76 per cent. between widowers and widows.

Table XVIII. affords some indication as to the educational status of the inhabitants in Scotland and its counties, inasmuch as there is there given the number and proportion of those who wrote their names, or simply adhibited their *mark* in lieu thereof, in the Marriage Register. Thus, in all Scotland, 96·77 per cent. of the husbands and 95·03 per cent. of their wives signed their names, leaving 3·23 per cent. of the former and 4·97 per cent. of the latter who made use of *mark*. The greatest failure in this respect is in the Insular-Rural Districts, where 11·48 per cent. of the men and 30·45 per cent. of the women were at marriage apparently unable to write. In the Principal Town Districts 3·53 per cent. of the former and 5·56 per cent. of the latter used *mark*; in the Large Town Districts 4·14 per cent. and 4·80 per cent. respectively did likewise, in the Small Town Districts the proportions are 2·86 per cent. and 4·30 per cent., while in the Mainland-Rural Districts only 1·45 per cent. of the bridegrooms and 2·09 per cent. of the brides were unable to write.

The counties which show worst in this way are :—Sutherland, where 3·28 per cent. of the men and 11·48 per cent. of the women who married during the year used *mark*, in Ross and Cromarty the proportions are 10·41 per cent. and 30·28 per cent., and in Inverness 9·86 per cent. and 20·89 per cent. In Kinross each signed their name on the same occasion, and in Orkney and Peebles all the bridegrooms did likewise.

In the two chief cities, as is seen at the foot of the table, Edinburgh gives 99·00 per cent. of the husbands and 98·45 per cent. of the wives as signing their names, leaving 1·00 per cent. of the former and 1·55 per cent. of the latter who used *mark*. The corresponding proportions for Glasgow are, in the first case, 95·44 per cent. and 92·84 per cent., in the latter 4·56 per cent. and 7·16 per cent. These figures generally indicate a further gradual improvement in this respect throughout the country.

3·72 per cent. of the marriages in Scotland were registered during May, 5·69 per cent. during February, 6·07 per cent. during March, 6·19 per cent. during September, 6·34 per cent. during October, 6·42 per cent. during April, 6·58 per cent. during August, 7·12 per cent. during November, 10·57 per cent. during July, 12·83 per cent. during December, 13·58 per cent. during January, and 14·89 per cent. during June.

The marriage rate for each ten thousand of estimated population in the undernoted European States is as follows:—63 in Norway, 68 in Denmark, 72 in the Netherlands, 74 in Switzerland, 75 in Italy, 76 in France, 77 in Belgium, 78 in Austria, 80 in the German Empire, and 81 in Prussia.

DEATHS.

During the year, 75,545 deaths were registered in Scotland, 37,463 of these being males, and 38,082 females, together giving a mortality rate of 186 in every ten thousand of the population as estimated, or one death in every 54 of the inhabitants. The number of deaths during the present year is fewer than that for 1891 by 8028, and the rate is lower than that for the last two years. The mortality rate among the males alone, for the present year, is 191, and among the females 181 per ten thousand

respectively. The mean death-rate for the last ten years is 194 per ten thousand of the population of Scotland as estimated.

Tables XIX. and XX. indicate the deaths and the corresponding rates as they occur in each of the five great Registration Districts. Thus, in the Principal Town Districts a total of 33,377 deaths was registered, being at the rate of 207 in each ten thousand of the inhabitants of the same,—the male deaths numbering 16,788, with a rate of 219, and the female 16,589, with a rate of 197 as above; in the Large Town Districts the total is 9368, or 187 per ten thousand,—the male deaths being 4641, at a rate of 184, and the female 4727, at a rate of 179 per ten thousand; in the Small Town Districts the total is 15,426, a rate of 179 per ten thousand,—the males 7468, the rate being 180, and the female deaths 7958, with a rate of 179; in the Mainland-Rural Districts the deaths are 15,349, equivalent to a rate of 161 per ten thousand of population,—the males 7586, with a rate of 162, and the females 7763, with a rate of 160; and in the Insular-Rural Districts the deaths number 2025, at a rate of 162 per ten thousand,—the male mortality being 980, with a death-rate of 168, the female 1045, with a rate of 156 per ten thousand of their respective sexes as estimated to be alive. The rate in the Principal Town Districts, and for both sexes,

is higher than that for Scotland or for any of the other districts, and in each district the male rate is above that of the female. The rate in the Urban Districts collectively is 190 in every ten thousand of the population of the same, while in the Rural Districts it is 161 in like proportion.

Tables XXI. and XXII. give the number of deaths and the proportionate mortality therefrom in each of the Principal Towns. Thus, in Glasgow, the total deaths registered during 1892 number 15,218, which is at the rate of 22·8 per thousand of its inhabitants as estimated; in Edinburgh the deaths are 5143, and the corresponding rate 19·4; in Dundee they are 2952, and the rate 19·0; in Aberdeen they number 2610, at a rate of 20·5; in Govan and Partick they are in number 1721, and rate 17·0 per thousand; in Leith they are respectively 1468 in number, and rate 21·0; in Paisley they are 1265 and 18·6; in Greenock they are 1244 and 19·7; in Coatbridge they are 592, the rate 19·2; in Perth they are 594, a rate of 19·6; and in Kilmarnock they amount to a total of 570, equal to a rate of 19·8 per thousand of its population.

Tables XXIII. and XXIV. give the deaths, male and female, at different ages, and the percentage of the same to the population as estimated at like ages in Scotland and in each of the five primary Registration Districts. Thus, of the children in Scotland presumably alive under one year of age, 14·860 per cent. of the males and 12·137 per cent. of the females died

TABLE XX.—Percentage of Male and Female Deaths to the Population in Scotland, and its Five Groups of Districts, during each of the Years 1855-1892.

during the year, ratios which are exceeded in the case of both sexes in the Principal and Large Town Districts, and that to a greater degree in the former districts than in the latter. The rate gradually falls in the other three districts, being at its lowest in the Insular-Rural Districts, where 6·982 per cent. of the male infants and 6·971 per cent. of the female at this early age succumb. In all the districts the male rate is above that of the female.

Under two years of age the rate for Scotland has declined to 5·693 per cent. in the case of the males and 5·398 per cent. in that of the females, alone exceeded in the Principal Town Districts and that for both sexes. The rate, as before, is lowest in the Insular-Rural Districts, in which, also, the female rate is higher than the male.

Under three years of age the death-rate for the males is 2·337 per cent. and for the females 2·311 per cent., alone exceeded among the children of the same age in the Principal Town Districts. The female rate is above that of the male in the two Rural Districts.

Under four years of age the death-rate for the country as a whole is, for the males, 1·385 per cent., and for the females 1·368 per cent., proportions again exceeded in the Principal Town Districts in the case of both sexes, and that of the males alone in the Large Town Districts. The female rate

is higher than the male in the Principal Town Districts and Insular-Rural Districts.

Under five years of age the mortality rate has fallen throughout the country to 0.990 per cent. in the case of the male and 0.991 per cent. of the female children estimated to be alive at that age, which rates are alone exceeded in the Principal Town Districts. The female rate is above that of the male in each district, except that of the Principal Towns.

TOTAL.	1.910	1.812	2.189	1.972	1.845	1.786	1.797	1.791	1.618	1.601	1.676	1.561

During the first five years of life the male death-rate is 5·214 per cent. and the female 4·553 per cent. of the children at like age presumed to be alive in Scotland during 1892, while during the following quinquennial period, 5–10 years, the rate has fallen, in the case of males, to 0·531 per cent., and of females to 0·569 per cent., proportions alone exceeded in the Principal Town Districts. Between 10–15 years the mortality rate is at a minimum, being in the case of the males 0·315 per cent., and of the females 0·367 per cent., rates exceeded in the case of both sexes, in the Small Town Districts, of the males alone in the Principal Town Districts, and of the females alone in the Large Town Districts; in the Rural Districts the female rate is distinctly higher than the male. Between 15–20 years the rate for all Scotland is for the males 0·545 per cent., and for the females 0·529 per cent., exceeded in the case of both sexes in the Large and Small Town Districts, and of the males alone in the Principal Town Districts and Insular-Rural Districts. Between 20–30 years the proportional mortality-rate was greater in the case of both sexes in the Principal Town Districts, of the males alone in the Insular-Rural Districts, and of the females in the Large and Small Town Districts than in the same for Scotland; and in the two latter, as also in the Large Town Districts, the female rate is higher than that of the males. Between 30–40 years the mortality-rate is, in the Principal Town Districts, and for both sexes, over that for Scotland, as is also that for the males in the Insular-Rural Districts and the females in the Small Town Districts; and in the Large Town Districts, Small Town Districts, and Mainland-Rural Districts the female rate is above that of the male. At ages over forty years the death-rate increases more rapidly for the whole country and for each of the districts, and, until an advanced age is attained, the Urban rate is above that in the Rural Districts, and, in the majority of cases, the percentage of male deaths is above that of female. When the total Urban mortality is compared with the Rural, it is found the male Urban rate is 2·01 per 100 of population, that of the female being 1·89, the male Rural rate 1·62, and the female 1·60.

TABLE XXV.—Percentage of Deaths at each Age to the Total Deaths in 1892.

[illegible]

mortality-rate of 11·32 per hundred, followed by Glasgow with one of 10·09, Coatbridge with 8·15, Govan and Partick with 7·72, Edinburgh with 7·64, Aberdeen with 6·78, Kilmarnock with 6·19, Dundee with 5·20, Paisley with 5·07, Greenock with 4·87, and Perth with 3·76. The mortality among children at all ages under five years in these towns is greatest in Leith, where 7·47 in every hundred of the same age died during the year, followed by Glasgow with a rate of 7·43, Edinburgh with 6·25, Aberdeen with 6·12, Coatbridge with 5·84, Dundee with 5·76, Govan and Partick

undernoted European States, during the year 1892, is as follows:—288 in Austria, 262 in Italy, 241 in the German Empire, 234 in Prussia, 226 in France, 218 in Belgium, 210 in the Netherlands, 194 in Denmark, 193 in Switzerland, and 177 in Norway.

CAUSES OF DEATH.

The number of deaths registered throughout Scotland during 1892 was 75,545, but in 748 cases the cause was so ill-defined or specified in such a manner as to be of no use for statistical purposes.

The death-rate for the country, as a whole, for both sexes conjointly per hundred thousand of the population as estimated, is 1859, being for the males alone 1910, and for the females 1812, in each case a lower rate than for the previous year. In the Principal Town Districts alone are the corres-

ponding rates higher than those for Scotland; they are lower in the other districts, being lowest in the Mainland Rural Districts, viz., 1609 per hundred thousand of the sexes combined, 1618 for the males alone, and 1601 for the females.

During the year under review 10,678 of the deaths are ascribed to Zymotics, which is 1351 fewer than occurred from the same last year, and is in the proportion of 265 per hundred thousand of the population, and form 14·27 per cent. of the total specified deaths. In the Principal Town Districts alone do we find the proportion for Scotland to be exceeded, the lowest occurring in the Mainland Rural Districts; and in each district the female mortality from this class of disease is greater than among the males, *vide* Tables XXVIII. and XXIX.

Table XXXII. shows the number and proportion of deaths from the chief Zymotic diseases, and from ordinary causes, so arranged as to exhibit the mortality due to each during five different periods of life. Thus, of the whole 10,678 such deaths, 6217 occurred during the first five years of life, 857 between 5–10 years, 248 between 10–15 years, 1969 between

15-60 years, and 1387 at ages above this; or 58·2 per hundred of such deaths occurred during the first five years of life, 8·0 between 5-10 years, 2·3 between 10-15 years, 18·5 between 15-60 years, and 13·0 at greater ages; so that, of the whole, 68·5 per cent. occurred during the first fifteen years of life. Table XXXIII. indicates how, of the total mortality in Scotland, 25·25 per cent. of the deaths registered as occurring at ages under 15 years are due to Zymotics, 7·21 per cent. being the percentage of the same at ages over 15 years.

During the year Measles caused 2280 deaths. Of these 2052, or 90·0 per cent. of the whole, are registered as occurring during the first five years of life, 198 or 8·7 per cent. during the next quinquennial period; one death is reported at a greater age than 60 years. Hooping-Cough caused 1792 deaths, of which 1691, or 94·4 per cent., occurred before the age of five years; 96, or 5·4 per cent., between 5-10 years. Diarrhœa and Dysentery caused 1324 deaths; 896, or 67·7 per cent. of them during the first five years of life, and 222, or 16·7 per cent., at greater ages than 60 years. Scarlet-Fever is the cause of 871 exits, of which 530, or 60·9 per cent., are between 0-5 years; 202, or 23·2 per cent., between 5-10 years; and 69, or 7·9 per cent., between 10-15 years, as also between 15-60 years. Diphtheria caused 807 deaths; 531, or 65·8 per cent. of them, between 0-5 years, and 196, or 24·3 per cent., between 5-10 years. Fevers are accountable for 741 deaths; 59 of them between 0-5 years, 84 between 5-10 years, 93 between 10-15 years, 474, being 64·0 per cent. of the whole, between 15-60 years, and 31 at greater ages. Of these 59 are due to Typhus and 644 to Enteric or Typhoid. 51, or 86·4 per cent., of the Typhus deaths occurred between 15-60 years; 412, or 64·0 per cent., of the Typhoid being at the same age. From Relapsing Fever 2 deaths are registered, from Cerebro-Spinal Fever 5, and from Simple or Ill-defined 31. Puerperal Fever caused 315 deaths.

TABLE XXXII.—Number and Proportion of Deaths at different Ages from the Zymotic and Ordinary Diseases in Scotland in 1892.

Total Deaths	24788	2651	1555	24057	22494	75545	32·8	3·5	2·1	31·8	29·8	100

Erysipelas accounts for 311 deaths; 117, or 37·6 per cent. of these between 0·5 years; 108, or 34·7 per cent., between 15-60 years; and 78, or 25·1 per cent., at greater ages. Syphilis caused 204 deaths; 165, or 80·9 per cent. of all during the first five years of life; 30, or 14·7 per cent., between 15-60 years; and 7, or 3·4 per cent., at greater ages.

Out of every hundred thousand of the population of Scotland, 265 are estimated to have succumbed during the year to disease of a Zymotic nature, equivalent to 14·27 per cent. of the total specified deaths. In the Principal Town Districts the rate is 333 per hundred thousand of population, and 16·09 per cent. of the specified deaths; in the Large Town Districts the rate is 217 per hundred thousand, or 11·96 per cent. of the deaths; in the Small Town Districts it is 240 per hundred thousand, or 13·37 per cent.; in the Mainland-Rural Districts it is 199 to population, or 12·36 per cent. of the deaths; and in the Insular-Rural Districts the rate is 266 per hundred thousand of population, or 16·47 per cent. of the specified deaths.

Tables XXX. and XXXI. give information of a like nature as to the Principal Towns. Thus, in Glasgow, Zymotics are the cause of a death-rate of 384 in every hundred thousand of the estimated population, and equal to 16·88 per cent. of the total specified deaths. Measles accounts for 118 of this, Hooping-Cough for 89, Scarlet-Fever for 46, Diarrhœa and Dysentery for 42, Diphtheria for 24, Fevers for 17 (of which 15 fall to Typhoid and 1 to Typhus), and Smallpox for 1.

In Edinburgh the ratio from the same class is 318 per hundred thousand, or 16·38 per cent. of the total; the rate for Measles being 152 per hundred thousand, for Hooping-Cough 32, for Scarlet-Fever 28, for Diarrhœa and Dysentery 22, for Diphtheria 17, and for Fevers 14 (12 being Typhoid and 2 Typhus).

In Dundee the proportionate mortality from Zymotics is 212 per hundred thousand of its inhabitants, or 11·15 per cent. of all the deaths. Of the above, 36 fall under Measles, 57 under Diarrhœal Affections, 32 under Fevers (26 being Typhoid and 5 Typhus), 26 under Hooping-Cough, and 16 under Diphtheria.

In Aberdeen the rate is 372, or 18·14 per cent. of the deaths are due to Zymotics. 115 of this falls under Measles, 82 under Hooping-Cough, 31 under Diphtheria, 28 under Diarrhœa and Dysentery, 16 under Scarlet-Fever, and 15 under Fevers (10 Enteric and 4 Typhus).

In Govan and Partick Zymotics together caused 221 deaths per hundred thousand of the population of the same, or 12·97 per cent. of the specified deaths. Measles accounts for 56 of the above, Hooping-Cough for 50, Diarrhœa and Dysentery for 35, Diphtheria for 29, Scarlet-Fever and Fevers each for 7, all of the latter being Typhoid.

In Leith 510 is the high ratio from Zymotics per hundred thousand of its population, and forms 24·28 per cent. of the deaths. 301 of this is due to Measles, 50 to Scarlet-Fever, 44 to Diarrhœal Affections, 24 to Hooping-Cough and to Diphtheria, and 19 to Fevers (13 being Typhus and 6 Enteric).

In Paisley 248 per hundred thousand of its inhabitants succumbed to Zymotics, being 13·30 per cent. of the total mortality. Hooping-Cough accounts for 87 of the above, Fevers for 31 (all Typhoid), Diarrhœa and Dysentery for 25, Diphtheria for 22, Measles for 16, and Scarlet-Fever for 15.

Greenock exhibits a ratio of 202 deaths from Zymotics in every hundred thousand of its population, or 10·24 per cent. of all deaths. Hooping-Cough

causes 43 of this, Diarrhœa and Dysentery 40, Scarlet-Fever 27, Diphtheria 19, Fevers 14 (6 to Typhus and 6 to Typhoid and 2 to Simple or Ill-defined), and Measles 3.

In Coatbridge the mortality from the same class of diseases is in the proportion of 344 per hundred thousand, or 17·89 per cent. of all. 105 of this falls under Measles, 52 under Diarrhoeal Affections, 43 under Hooping-

In Kilmarnock 462 is the mortality-rate to the population as before, and Zymotics form 23·32 per cent. of all the specified deaths. 91 of this ratio is due to Diarrhoea and Dysentery, 80 to Diphtheria, 63 to Hooping-Cough, and 38 to Scarlet-Fever, as also to Fevers (28 of the latter Enteric and 10 Simple or Ill-defined), 28 to Measles.

From Smallpox there was 11 deaths during the year, in the persons of 7 males and 4 females. Four of the males, aged respectively 4 weeks, 21 years, 37 years, 45 years, and 2 of the females, aged 28 years and 31 years, died in Glasgow. One male, aged 50 years, died in Edinburgh; 1 male, aged 55 years, in Perthshire; 1 male, aged 2½ years, in Ayrshire; 1 female, aged 23 years, in Fifeshire; and 1 female, aged 47 years, in Lanarkshire. In 7 of these 11 there was no remark in the death certificate as to vaccination, in 3 it had been been performed, and in 1 vaccination is stated to be doubtful. In 11 deaths Chicken-pox is mentioned as one cause.

To Measles 2280 deaths are ascribed throughout Scotland, giving a mortality-rate of 56 per hundred thousand of the inhabitants, and constituting 3·05 per cent. of the total specified deaths; the male deaths are 1145, the female 1135. The inhabitants of the Principal Town Districts were the heaviest sufferers from this, as 106 in every hundred thousand of them so succumbed, the total deaths from Measles in these districts being 1703. The lowest rate is in the Insular-Rural Districts, viz., 4.

Scarlet-Fever caused 871 deaths, at the rate of 22 per hundred thousand of the population, and about 1·16 per cent. of the total deaths,—males, 395, females, 476. The heaviest mortality is in the Principal Town Districts, viz., 31 per hundred thousand of the inhabitants; the lightest in the Insular Rural Districts, viz., 2.

Whooping-Cough caused 1792 exits, equal to 44 in every hundred thousand of the population, and 2·39 per cent. of all the deaths,—males, 778, females, 1014. The highest ratio is in the Principal and Small Town Districts, 63 in the former and 40 in the latter per hundred thousand of their respective populations, and lowest in the Mainland-Rural Districts, viz., 23 in like proportion.

Diphtheria caused 807 deaths during the year, being at the rate of 20 in every hundred thousand of the population, and form 1·08 per cent. of the total deaths,—males, 373, females, 434. The rate is highest in the Principal and Small Town Districts, being 24 in the former and 20 (the same as for Scotland) in the latter; it is lowest in the Insular-Rural Districts, viz., 7.

The deaths from Continued Fevers number 741, being in the proportion of 18 per hundred thousand of population, and forming 0·99 per cent. of the total mortality,—male deaths, 364, female, 377. The Small Town Districts apparently suffered most from fevers in proportion to the number of the

inhabitants, inasmuch as 20 deaths occurred in them per hundred thousand. In the Principal and Large Town Districts the rate for the sexes combined is 18, the same as for Scotland. Typhus Fever caused 59 deaths, Typhoid 644,—males 325, females 319,—most marked in the Small Town Districts, where 19 deaths per hundred thousand of the inhabitants so succumbed. Relapsing Fever caused 2 deaths, Cerebro-Spinal Fever 5, and Simple or Ill-defined Fever 31. Table XXXVII. shows that 155 of the Typhoid deaths occurred in the Rural Districts, and formed 87·57 per cent. of the total fever deaths registered in the same; while in the Urban Districts 489 deaths occurred from Typhoid, equal to 86·70 per cent. of the total fever mortality therein. Typhus caused 12 deaths in the Rural Districts, or 6·78 per cent. of the fever deaths; and in the Urban Districts they number 47, or 8·33 per cent.

Diarrhœa and Dysentery caused 1324 deaths, at the rate of 33 per hundred thousand of the population, and equivalent to 1·77 per cent. of all the deaths,—males, 691, females, 633. Of the whole 1324 such deaths, 1095 are registered in the Urban Districts, and 229 in the Rural Districts. The rate in each of the five districts separately is 38 per hundred thousand of the population in the Principal and Large Town Districts, 33 in the Small Town Districts, 23 in the Mainland Rural Districts, and 11 in the Insular-Rural Districts.

The epidemic of Influenza, which had been prevalent over Scotland during the last two years, still continued throughout the present year (1892). The total number of deaths ascribed to it, or in which it appeared as a cause, being 1827,—males 810, and females 1017; which, however,

show a considerable diminution from the numbers of 1891, when a total of 2508 is credited to the same disease. During the year now under review, the mortality from Influenza equalled 44 per hundred thousand of the estimated population, and formed 2·39 per cent. of all the specified deaths. 1786 of the above deaths were due solely to Influenza, 786 of them being males, and 1000 females; while in the remaining 41—males 24, and females 17—this disease was mentioned as contributory, although not the real cause of death. Table XXXIIA. is presented as before to afford more full information on the subject. It is there seen how, as regards the seasonal mortality, 939 of the deaths are registered during January, 312 during February, 188 during March, 128 during April, 84 during May, 39 during June, 27 during July, 17 during August, 21 during September, 16 during October, 21 during November, and 35 during December, thus indicating a steady fall, and therefore apparent decline, in the epidemic during the year. The total number of deaths from Influenza during December 1891 was 1106, the maximum attained in any one month since the incidence of the epidemic.

The distribution of the deaths in the five great Registration Districts is as follows:—Of the 939 deaths during January, 173 occur in the Principal Town Districts, 81 in the Large Town Districts, 205 in the Small Town Districts, 397 in the Mainland-Rural Districts, and 83 in the Insular-Rural Districts. Of the 312 during February, 58 are in the Principal Town Districts, 31 in the Large Town Districts, 67 in the Small Town Districts, 125 in the Mainland-Rural Districts, and 31 in the Insular-Rural Districts. Of the 188 during March, 37 are in the Principal Town Districts, 16 in the Large Town Districts, 45 in the Small Town Districts, 60 in the Mainland-Rural Districts, and 30 in the Insular-Rural Districts. Of the 128 during April, 21 are in the Principal Town Districts, 13 in the Large Town Districts, 26 in the Small Town Districts, 43 in the Mainland-Rural Districts, and 25 in the Insular-Rural Districts. Of the 84 during May, 26 are in the Principal Town Districts, 3 in the Large Town Districts, 15 in the Small Town Districts, 25 in the Mainland-Rural Districts, and 15 in the Insular-Rural Districts. Of the 39 during June, 5 are in the Principal Town Districts, 3 in the Large Town Districts, 9 in the Small Town Districts, 15 in the Mainland-Rural Districts, and 7 in the Insular-Rural Districts. Of the 27 during July, 8 are in the Principal Town Districts, 2 in the Large Town Districts, 6 in the Small

Town Districts, 8 in the Mainland-Rural Districts, and 3 in the Insular-Rural Districts. Of the 17 during August, 3 are in the Principal Town Districts, 4 in the Large Town Districts, 3 in the Small Town Districts, 5 in the Mainland-Rural Districts, and 2 in the Insular-Rural Districts. Of the 21 during September, 2 are in the Principal Town Districts, 2 in the Large Town Districts, 9 in the Small Town Districts, 8 in the Mainland-Rural Districts, while there are none in the Insular-Rural Districts. Of the 16 during October, 5 are in the Principal Town Districts, 1 in the Large Town Districts, 4 in the Small Town Districts, 5 in the Mainland-Rural Districts, and 1 in the Insular-Rural Districts. Of the 21 during November, 6 are in the Principal Town Districts, 2 in the Large Town Districts, 8 in the Small Town Districts, 4 in the Mainland-Rural Districts, and 1 in the Insular-Rural Districts. Of the 35 during December, 9 are in the Principal Town Districts, 4 in the Large Town Districts, 11 in the Small Town Districts, 8 in the Mainland-Rural Districts, and 3 in the Insular-Rural Districts. The total number of deaths in each district from Influenza are:—353 in the Principal Town Districts, equal to a death-rate of 22 per hundred thousand of the inhabitants, or 1·05 per cent. of the total specified deaths in the same; in the Large Town Districts they number 162, equal to 30 per hundred thousand living, and 1·69 per cent. of all deaths; in the Small Town Districts they are 408, at the rate of 46 in every hundred thousand of the population, and forming 2·58 per cent. of all the deaths; in the Mainland-Rural Districts they are 703, a rate of 73 per hundred thousand, and 4·52 per cent. of the deaths; and in the Insular-Rural Districts they number 201, equivalent to 174 deaths in every hundred thousand of the inhabitants of the same, and 10·78 per cent. of the total mortality.

In the Counties,—47 deaths were registered during the year in Shetland from Influenza, equal to 9 per cent. of the deaths in the same, 35 or 8 per cent. is the corresponding number and ratio in Orkney, 69 or 10 per cent. in Caithness, 35 or 9 per cent. in Sutherland, 126 or 9 per cent. in Ross and Cromarty, 100 or 7 per cent. in Inverness, 2 or 1 per cent. in Nairn, 42 or 5 per cent. in Elgin, 72 or 7 per cent. in Banff, 201 or 4 per cent. in Aberdeen, 20 or 4 per cent. in Kincardine, 68 or 1 per cent. in Forfar, 51 or 2 per cent. in Perth, 48 or 1 per cent. in Fife, 4 or 4 per cent. in Kinross, 14 or 3 per cent. in Clackmannan, 43 or 2 per cent. in Stirling, 29 or 2 per cent. in Dumbarton, 88 or 7 per cent. in Argyll, 8 or 2 per cent. in Bute, 37 or 1 per cent. in Renfrew, 100 or 2 per cent. in Ayr, 210 or 1 per cent. in Lanark, 23 or 2 per cent. in Linlithgow, 138 or 2 per cent. in Edinburgh, 19 or 3 per cent. in Haddington, 23 or 5 per cent. in Berwick, 7 or 3 per cent. in Peebles, 7 or 2 per cent. in Selkirk, 36 or 4 per cent. in

TABLE XXXVIII.—Monthly Deaths from Fever in Eight of the Principal Towns of Scotland during the Ten Years 1883–1892; specifying those from Typhus and Enteric Fever.

Roxburgh, 63 or 4 per cent. in Dumfries, 27 or 4 per cent. in Kirkeudbright, and 35 or 6 per cent. in Wigtown.

Of the 1786 deaths due solely to Influenza in Scotland during the year, 103 or 5·77 per cent. succumbed during childhood (0–5 years); 107 or 5·99 per cent. during adolescence (5–20 years); 565 or 31·63 per cent. during adult life (20–60 years); and 1011 or 56·61 per cent. at ages over 60 years.

Cancer caused 2715 deaths during the year, giving a mortality-rate of 67 per hundred thousand of the inhabitants of Scotland, and constituting 3·63 per cent. of the total specified deaths,—males 1025, females 1690. The rate varies in the different districts, being highest in the Mainland-Rural Districts, where it is 75 per hundred thousand, and lowest in the Insular-Rural Districts, viz., 56. In the Principal Towns, as seen from Tables XXX. and XXXI., this rate is highest in Edinburgh, 93 per hundred thousand, followed by Aberdeen with one of 89, Dundee 80, Perth 70, Paisley 69, Greenock 65, Glasgow 62, Leith 57, Govan and Partick 39, Kilmarnock 38, and Coatbridge 30.

Diseases of a Tubercular nature are credited with 9318 lives, at the rate of 231 per hundred thousand of population, and forming 12·46 per cent. of the total deaths,—males 4662, females 4656. The above rate for Scotland is exceeded in the Principal Town Districts, where it is 273, and in the Large Town Districts, where it is 242 in like proportion, falling in the other districts to 220 in the Small Town Districts, 173 in the Mainland-Rural Districts, and 171 in the Insular-Rural Districts. When the proportion between such deaths and the total specified deaths is computed, 13·17 is the percentage found to be due to them in the Principal Town Districts, 13·37 per cent. in the Large Town Districts, 12·26 per cent. in the Small Town Districts, 10·76 per cent. in the Mainland-Rural Districts, and 10·57 per cent. in the Insular-Rural Districts. Phthisis accounts for 6765 of the total 9318 deaths, and equal to 168 per hundred thousand of population, or 9·04 per cent. of the total mortality,—males 3312, females 3453. The death-rate from Consumption in each district is as follows:—199 per hundred thousand of the inhabitants in the Principal Town Districts, 172 in the Large Town Districts, 153 in the Small Town Districts, 129 in the Mainland-Rural Districts, and 149 in the Insular-Rural Districts. In the case

TABLE XXXIX.—The Twenty-two most fatal Causes of Death in Scotland in 1892, arranged in the order of their fatality.

DISEASES.	Proportion of Deaths to 100,000 living.	DISEASES.	Proportion of Deaths to 100,000 living.
Bronchitis	180	Influenza	44
Phthisis	168	Hooping-cough	44
Diseases of Heart, &c.	161	Paralysis	39
Pneumonia	122	Diarrhoea and Dysentery	33
Age	104	Enteritis	28
Violent Deaths	69	Tubercular Meningitis	27
Apoplexy	68	Convulsions	27
Cancer	67	Scarlet Fever	22
Developmental Diseases of Children	58	All Liver Diseases	22
Atrophy and Debility	57	Diphtheria	20
Measles	56	Tabes Mesenterica	20

of the males who succumb to this disease in Scotland, 10·5 per cent. did so at ages under 15 years, 68·6 per cent. between 15–45 years, and 20·9 per cent. at greater ages; the corresponding percentages among the females are 12·7, 73·3, and 14·0. On comparing the deaths from Phthisis with the total specified deaths in each of the Principal Towns, we find that in Perth 13·51 per cent. were due to this fell disease, in Paisley it was 11·16 per cent., in Dundee 10·98 per cent., in Greenock 10·24 per cent., in Glasgow 9·69 per cent., in Kilmarnock 9·36 per cent., in Edinburgh 8·97 per cent., in Aberdeen 8·92 per cent., in Coatbridge 8·52 per cent., in Govan and Partick 8·41 per cent., and in Leith 8·19 per cent. *Tabes Mesenterica* caused 807 deaths,—males 417, females 390; *Tubercular Meningitis* 1112 deaths,—males 588, females 524; and *Scrofula* 634 deaths,—males 345, females 289.

From Diseases of the Brain and Nervous System there are 8962 deaths, at the rate of 223 per hundred thousand of the population, and forming 11·98 per cent. of the total certified deaths,—males 4512, females 4450. In the Principal Town Districts and Large Town Districts the former rate is exceeded, being in them 243 and 247 respectively; the Insular-Rural Districts standing lowest with one of 139. Among the Principal Towns diseases of the Nervous System were most marked in Greenock, where 288 deaths in every hundred thousand of its population were so registered, followed by Coatbridge with 266, Glasgow with 257, Govan and Partick with 248, Aberdeen with 242, Perth with 239, Edinburgh with 226, Paisley with 224, Dundee with 221, Leith with 205, and Kilmarnock with 196. Of this class of disease in Scotland Apoplexy caused 2734 deaths,—males 1205, females 1529; Paralysis caused 1571 deaths,—males 723, females 848; and Convulsions 1088,—males 603, females 485.

Diseases of the Circulatory System are the cause of 6471 deaths, equivalent to 161 in every hundred thousand of the population, and forming 8·65 per cent. of the total specified deaths,—males 3105, females 3366. This rate is exceeded in the Small Town Districts and Mainland-Rural Districts, in which it is 176 and 172 respectively, while it is lowest in the Insular-Rural Districts, viz., 105. In the Principal Towns the highest ratio to population as above is in Perth 219, followed by Edinburgh 206, Greenock 186, Dundee 168, Leith 165, Aberdeen 162, Paisley, 149, Glasgow 136, Kilmarnock 119, Govan and Partick 109, and Coatbridge 108. Disease of the Heart caused 5701 deaths,—males 2716, females 2985.

From Diseases of the Respiratory Organs, other than Phthisis, 14,734 deaths are registered, at the rate of 366 in each hundred thousand of population, and forming 19·70 per cent. of the total mortality,—males 7678, females 7056. In the Principal Town Districts such deaths are in the ratio of 456 per hundred thousand of the population, and form 21·98 per cent. of the total deaths in the same; in the Large Town Districts the rate to population is 372, the percentage of deaths 20·49; in the Small Town Districts it is to population 329, or 18·36 per cent. of the deaths; in the Mainland-Rural Districts it is to population 262, or 16·28 per cent. of the deaths; and in the Insular-Rural Districts it is to population 222, or 13·73 per cent. of the deaths. Of these affections Bronchitis caused 7260 deaths,—males 3383, females 3877; Pneumonia 4901 deaths,—males 2853, females 2048; and Croup 540,—males 291, females 249. As to the Principal Towns, Glasgow stands with the highest death-rate from such affections, inasmuch as 551 in every hundred thousand of its estimated

population so succumbed, and equal to 24·20 per cent. of all the specified deaths; it is followed by Perth with corresponding ratios of 468 or 23·82 per cent., Dundee with 431 or 22·61 per cent., Govan and Partick with 425 or 25·00 per cent., Kilmarnock with 416 or 21·03 per cent., Leith with 398 or 18·96 per cent., Greenock with 376 or 19·03 per cent., Edinburgh with 372 or 19·16 per cent., Coatbridge with 367 or 19·08 per cent., Aberdeen with 361 or 17·61 per cent., and Paisley with 324 or 17·42 per cent.

To Diseases of the Digestive System 5371 deaths are credited, at the rate of 133 in every hundred thousand of the population, and forming 7·18 per cent. of the total mortality,—males 2609, females 2762. In each of the Urban Districts the above rate is exceeded most so in the Small Town Districts where it is 145; in the Insular-Rural Districts it is 86. The rate in the Principal Towns varies from 159 per hundred thousand of the population in Aberdeen to 106 in Leith, in Greenock it is 153, in Paisley 149, in Glasgow and in Coatbridge 144, in Govan and Partick 135, in Kilmarnock 129, in Perth 126, in Edinburgh 121, and in Dundee 110. Enteritis caused 1137 deaths; Peritonitis 722; Hernia 142; Liver Diseases 912; Ileus, Stricture of the Intestine, and Intussusception together 408.

Diseases of the Urinary Organs are accountable for 1960 deaths, equivalent to 49 per hundred thousand of population, and 2·62 per cent. of the total certified deaths,—males 1198, females 762. Acute Nephritis caused 411 deaths; Bright's Disease 726; Calculus 39; other diseases of Bladder and Prostate 299; while 274 are due to other diseases of the Urinary System not specially differentiated.

Diseases of the Organs of Generation caused 257 deaths,—males 28, females 229; Ovarian Disease caused 83 deaths, and Uterine Affections 102. Diseases incidental to Parturition, other than Puerperal Fever, to which 315 deaths are attributable, cause 373, together giving a total of 688.

To Diseases of the Organs of Locomotion—of the Bones and Joints—516 deaths are due,—males 299, females 217, and Diseases of the Skin cause the death of 137 males and 138 females.

From Developmental Diseases, not including Old Age, there are 2337 deaths,—males 1304, females 1033, of which Premature Birth accounts for 1863, Atelectasis for 153, Cyanosis, Spina Bifida, and other Congenital Defects for 321,—males 177, females 144.

To Old Age the deaths of 1592 men and 2620 women are ascribed; 25 of the former and 47 of the latter at ages between 95 and 100 years. 6 of the men and 10 of the women who died during the year are stated to have been 100 or over, one man was stated to be 102, and another 103 years at death, while four of the women were 101, and one 103 years of age.

2776 of the deaths are due to Violence, equal to 69 per hundred thousand of the population (the male rate being 104, and the female 35), and together equivalent to 3·71 per cent. of the total deaths,—male deaths from Violence 2015, female, 761. Accident or Negligence accounts for 2530 deaths,—males 1834, females, 696. Those due to Violence other than Accident are 246,—males 181, females 65; and of these 23 are Homicidal and 222 Suicidal,—male Suicides 172, female 50. One man was executed during the year. Of the Accidental Deaths, 129 occurred in Mines and Quarries, 315 deaths were caused by Railways, or by other Vehicles, or by Horses. Burns and Scalds account for the death of 324 individuals,—males 168, females 156.

Accidental drowning end the lives of 462 persons, besides which 51 males and 16 females took their own lives in a similar manner; 49 males and

The poisons which caused death accidentally were, Opium in one form or other in the case of 16 males and 9 females; Aconite, 1 male; Belladonna, 1 male; Cocaine, 1 female; Chloral, 1 male; Liniments, 1 male and 1 female; Hydrocyanic Acid, 1 male; Chloroform, 1 male and 3 females; Lead, 4 males and 2 females; Arsenic, 1 female; Corrosive Sublimate, 1 male; Ammonia, 1 male; Chlorine, 1 male; Alcohol, 2 males; Hydrochloric Acid, 1 male; Carbolic Acid, 3 males and 2 females; Carbonic Acid Gas, 3 males; Coal Gas, 3 males and 2 females; Sewer Gas, 1 male; Fumes from an Iron Furnace, 1 male; Berries (kind not stated), 1 male; an Irritant Poison, 1 male; a Narcotic Poison, 1 female, in both cases not stated; and in the case of 4 males and 1 female the form of poison is not mentioned. The poisons by means of which suicide was committed were, Opium in the case of 4 males and 1 female; Hydrocyanic Acid, 1 male; Cyanide of Potassium, 1 male; Strychnia, 1 male; Arsenic, 2 males; Carbolic Acid, 1 male and 2 females; while the poison which 1 male took is not stated.

Table XXXIXA. gives the number of males and females who committed Suicide during the year, and the special methods by which this was brought about. Thus 8 males and 1 female committed Suicide on Railways; 17 males shot themselves; 33 males and 13 females cut or stabbed themselves to death; 4 males and 3 females precipitated themselves from some height; 51 males and 16 females drowned themselves; 47 males and 14 females had recourse to hanging; 11 males and 3 females took poison; and 1 male voluntarily ended his life by means of the explosion of a Gelatine Cartridge.

85 of the male Suicides and 16 of the female occurred in the Principal Town Districts; 13 of the male and 9 of the female in the Large Town Districts; 29 of the male and 12 of the female in the Small Town Districts; 41 of the male and 12 of the female in the Mainland-Rural Districts; and 4 of the male and 1 of the female in the Insular-Rural Districts.

TABLE XL.—Monthly Mortality and Mean Temperature in Scotland during 1892, compared with the Mean of the Ten Years 1881-1890.

YEAR 1892.				1881-1890.

WEATHER AND ITS INFLUENCE ON THE MORTALITY.

The following remarks on the weather of 1892 are extracted from the Notes of the Astronomer-Royal, appended to the monthly Reports issued by the Registrar-General:—

The month of *January* 1892 was decidedly cold and dry, with relatively steady barometric pressure.

February was a month of low and very irregular barometric pressure, a mean temperature decidedly below the average, and a relatively small precipitation of moisture spread over an unusual number of days.

March was on the whole an exceptionally cold and dry month, with a large range of temperature, a high and steady barometer, low wind pressure, and a slight excess of winds from the north and east.

The month of *April* was somewhat cold and variable in temperature, exceptionally dry, with high and steady barometric pressure, accompanied by moderate air movement, in which northern and eastern are most frequently represented.

TABLE XLI.—Meteorology of Scotland for 1892, deduced from Observations made at 55 Stations of the Meteorological Society of Scotland, the particulars for each of the Stations having been published in the Quarterly Reports of the Registrar-General; also, the Number of Births, Deaths, and Marriages registered during each Month of the Year 1892, as stated in the Quarterly Reports.

The month of *May* was relatively warm and rainy, while barometric pressure was normal both in amount and range.

June was on the average a cold and wet month, while the barometric pressure was nearly normal, though with slightly greater range than usual.

In *July* the barometric pressure was high and attended with an amount of variation quite unusual for this season.

The weather of *August* was chiefly characterised by low temperature and excessive rainfall, accompanied by a barometric pressure and range below the average for this month.

The month of *September* was very cold and windy, with a normal amount of rainfall spread over rather more days than usual.

The month of *October* was unusually wet and cold, with a strongly marked preponderance of northerly winds. The barometric pressure, while strictly normal as to range, was decidedly low.

The month of *November* was relatively warm, with a slightly high and very steady barometer accompanied by a very marked preponderance of winds from the south and south-east.

The month of *December* was extremely cold, dry, and calm for the season. In accordance with these features, the barometer, while somewhat higher than usual, was exceptionally steady; indeed, the monthly range was lower than in any December since the commencement of these returns in 1856.

Tables XL. and XLI. give some information regarding the meteorological conditions of each month, and the mortality corresponding to the same for Scotland. The former table indicates the mean temperature of each month

TABLE XLII.—Showing the connection between certain Atmospheric Phenomena, especially Temperature, and the Deaths from certain Diseases and Classes of Disease, in Eight of the Principal Towns of Scotland, during each Month of the Year 1892.

1892.	Jan.	Feb.	Mar.	April.	May.	June.	July.	Aug.	Sept.	Oct.	Nov.	Dec.

of the year as also the number of monthly deaths, and there is added for the sake of comparison the mean for a former decennial period.

The mean temperature of the last month of 1891 was $38^{\circ}5$, and this low reading was continued during the first three months of the year under review, 1892, after which the thermometer rose until its maximum mean was attained during August $55^{\circ}6$, after which it fell during the autumnal and winter months, being at its lowest in December $34^{\circ}0$. The mean thermometric reading for the year is $44^{\circ}5$, which is $1^{\circ}4$ below the mean for 1891. Table XLI. shows how, as a rule, the heaviest mortality occurred during the colder months of the year, while the lowest occurred during the milder, the monthly death-rates being 11·32 per cent. of the whole during January, 8·87 per cent. during February, 9·54 per cent. during March, 8·71 per cent. during April, 8·55 per cent. during May, 7·38 per cent. during June, 6·96 per cent. during July, 7·11 per cent. during August, 6·61 per cent. during September, 7·28 per cent. during October, 8·04 per cent. during November, and 9·63 per cent. during December.

Table XLII. shows the monthly relation between certain meteorological conditions and the deaths from some of the more ordinary diseases in eight of the Principal Towns in Scotland. Miasmatic diseases as a whole caused the heaviest mortality during the first and latter months of the year. From Small-pox there were 7 deaths in these towns registered during the months of October, November, and December. Measles and its sequelæ caused the largest number of deaths during May, June, October, November,

TABLE XLIII.—Deaths, Temperature, and Fall of Rain in Eight of the Principal Towns of Scotland during each Week of the Year 1892; also the Proportion of Deaths to every Thousand of the Population.

and December. Scarlet Fever is most in evidence during the latter five months of the year; while Hooping-cough bulks most largely during the spring and early summer months, March, April, May, and June. Diphtheria is most manifest during the early and late months, as is also the case with Fevers. Diarrhœal deaths are as usual most numerous during the autumnal months.

Phthisis, which claims a heavy toll during each month, does so most markedly during the more inclement months, those at either end of the twelve, its lowest mortality being during the autumnal months of August, September, and October.

Upon no class of disease has climatic conditions greater effect than on the more acute affections of the Respiratory System, as is evident from the

TABLE XLIV.—Monthly Mortality at Four Periods of Life in Eight of the Principal Towns of Scotland during the Year 1892, and Proportion at each Age in every Hundred Deaths per Month.

November . . .	1263	203	838	498	2802	1085
December . . .	1382	247	870	603	3102	1201
YEAR . . .	11,936	2,697	9,891	6,465	30,989	12,000

large number of deaths from such during the colder months of January, February, March, November, and December, and much the same occurs with diseases of the Heart and Circulatory Organs, the minimum in each case being during the milder months of July, August, and September.

Cerebral diseases generally, which, as a rule, tell more upon those up in years than on the young, are seen to be more frequently causes of death during the colder than during the warmer months of the year.

Age as a cause of death during the present year, is most to be noted during January, March, and April, least so during the summer months of June and July.

Tables XLIV. and XLV. are constructed to show the number and proportion of monthly deaths in these towns at four series of ages.

Of the total deaths, 11,743 or 38·5 per cent. of the whole were of children (0-5 years), who suffered in largest numbers during the months of March, May, November, and December, months when Hooping-cough, Measles, and Scarlet Fever, as also diseases of a respiratory character, were rife.

Of Adolescents, 5-20 years, 2652 deaths are registered, equal to 8·7 per cent. of all, and most largely during April, May, and December, when Miasmatics generally, and Consumption stand prominently as causes.

Adults, 20-60 years, succumbed in number 9731, or 31·9 per cent. of all, and apparently most so during the early and late months of the year.

The deaths of the aged, 60 years and above, number 6364, or 20·9 per cent. of all, and as with the last, are most noticeable during the colder months.

I have the honour to be,

SIR,

Your most obedient Servant,

R. J. BLAIR CUNYNGHAME.

GENERAL REGISTRY OFFICE OF BIRTHS, &c.

EDINBURGH, 5th October 1894.

APPENDIX TABLES.

Districts containing Parliamentary and Royal Burghs are printed in capitals, thus:—EDINBURGH. Districts containing Towns, of 2000 Inhabitants and upwards are printed in small capitals, thus:—CARLUKE.

N.B.—An asterisk "*" is prefixed to those Districts which have different names from the Parishes in which they are situated or are comprised of more, or parts of more, than one Parish, and the component parts of these Districts will be found at page 474.

A dagger "+" is prefixed to those Districts which consist of only a part of a Parish of the same name.

CONSTITUTION OF THE DISTRICTS DISTINGUISHED IN THE PRECEDING TABLES
BY AN ASTERISK (*).

No.	Districts.	Component Parts (Parishes).
14	Deerness	Part of St Andrews.
15	Eday and Pharay	Part of Stronsay and Eday.
22	North Ronaldshay	Part of Cross and Burness.
26	Sanday	Lady, and part of Cross and Burness.
37b	Keiss	Parts of Canisbay and Wick.
58	Applecross	(1) Part of Applecross; (2) Remainder of Applecross and parts of Gairloch and [Lochcarron.
59b	Carnoch	Parts of Contin and Urray.
62	Dingwall	Dingwall and Part of Fodderty.
76	Lochcarron	Parts of Applecross and Lochcarron.
85	Urray	Parts of Kilmorack and Urray.
86b	Carloway	Parts of Barvas and Uig.
87	Lochs	Lochs and part of Uig.
92a	Boleskine, &c.	(1) Parts of Boleskine and Abertarf, and Dore; (-) Part of Boleskine and [Abertarf.
92b	Cannich	Parts of Kilmorack and Kiltarlity.
96a	Dores	Parts of Boleskine and Abertarf, and of Dore.
99	Kilmonivaig	(1) Part of Kilmonivaig; (2) Parts of Kilmallie and Kilmonivaig.
100	Kilmorack	Parts of Kilmorack, Kiltarlity and Convinth, and Urray.
101	Kiltarlity	Part of Kiltarlity and Convinth.
112	Kilmuir	(1) Part of Kilmuir; (2) Remainder of Kilmuir, and part of Snizort.
128b	Cromdale, &c.	(1) Part of Cromdale; (2) Remainder of Cromdale, and part of Duthil.
135	Elgin	Elgin, and parts of New Spynie, and St Andrews-Lhanbryde.
136	New Spynie	Parts of Duffus and New Spynie.
152	Enzie	Parts of Bellie and Rathven.
155b	Glenrines	Parts of Aberlour and Mortlach.
167	Seafield	Parts of Cullen and Rathven.
169	Aberdour	Parts of Aberdour and Strichen.
196	Fraserburgh	Fraserburgh and part of Strichen.
210a	King-Edward	(1) Parts of Alvalh and King-Edward; (2) Remainder of King-Edward.
210b	Kinninmonth	Parts of Crimond, Longside, Lomay, Old Deer, and Strichen.
217	Methlic Coldstone and Cromar	Parts of Glenmuick, Tullich and Glencairn, Logie Coldstone, and Tarland.
222b	Millbrex	Methlic and part of Eilon.
227b	New Pittsligo	Parts of Fyvie and Monquhitter.
237b	Savoch	Parts of Aberdour, New Deer, Strichen, and Tyrie.
240	Strathdon	Parts of Eilon, New Deer, Old Deer, and Tarves.
242	Tarland	Strathdon, and part of Towie.
249b	Ythan Wells	Parts of Logie-Coldstone, Tarland and Towie.
272	Arbroath	Parts of Auchterless and Forgue.
282	Dundee	Parts of Arbroath, and St Vigeans.
294a	Kettins	Dundee, and parts of Liff, Benzie and Invergowrie, and Murroes.
294b	Kilry	Kettins and parts of Cargill and Collice.
319	St Vigeans	Parts of Glenisla and Lintrathen.
324	Aberfeldy	Parts of Arbroath, Panbride, and St Vigeans.
328b	Ardoch	Parts of Dull, Kenmore, and Logierait.
330	Auchtergaven	Parts of Blackford, Dunblane, and Muthill.
351	Balquhiddier	Parts of Auchtergaven, Moneydie, and Monzie.
353	Blackford	Balquhiddier, and part of Comrie.
354	Blair Athol	Parts of Blackford and Glendevon.
355	Blairgowrie	Parts of Blair-Athol, and Moulin.
357	Caputh	Parts of Bendochy and Blairgowrie.
359	Clunie	Parts of Caputh, Clunie, Collice, Dunkeld and Dowally, and Kinloch.
342	Crief	Parts of Crief, Fowlis-Wester, Monzievaird and Strowan, and Muthill.
344	Dowally	Parts of Dunkeld and Dowally, and Logierait.
346	Dull	Parts of Dull and Weem.
349	Dunkeld	Part of Dunkeld and Dowally.
355b	Foss	Parts of Blair-Athol and Dull.
357	Fowlis-Wester	Parts of Fowlis-Wester, and Monzievaird and Strowan.
360	Kenmore	Parts of Fortingall and Kenmore.
361	Killin	Parts of Fortingall, Kenmore, and Killin.
366	Kinfauns	Parts of Kinfauns and Kinnoull.
369	Kinnoull	Parts of Kinfauns, Kinnoull, St Madoes, St Martins, and Scone.
375	Logiealmond	Parts of Little Dunkeld, Methven, and Monzie.
376	Logierait	Parts of Logierait, Moulin, and Weem.
379	Meikle	Meikle and part of Coupar-Angus.
380	Methven	Parts of Auchtergaven and Methven.
383	Monzievaird and Strowan	Parts of Comrie, Monzievaird and Strowan, and Muthill.
384	Moulin	Parts of Logierait and Moulin.
386a	Muthill	Parts of Comrie and Muthill.
386b	Persie	Parts of Alyth, Blairgowrie, and Kirkmichael.
387	Perth	Perth, and parts of Kinnoull, Scone, and Tibbermore.
393b	Stanley	Parts of Auchtergaven, Kinclaven, and Redgorton.

Ardoch, . . . 328		Buckle and Preston, . . . 728	Clackmannan, . . . 466	
			Clatt, . . . 180	

* The actual number of Districts is 1051—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 5 and 14 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place compound names in the order in which they are pronounced.

Crosshill, . . . 584	Dunlop, . . . 591	Forgan, . . . 431	Hamilton, . . . 647	Kilbucko, &c., 763
